

P20020.A02

comprising:

a scene-changing system that changes a scene on said monitor between an endoscope-image-display scene and a patient-data-list-display scene;

*AI*  
*Amel*  
a storage system that stores patient data forming a patient data list which is displayed on said monitor when the scene on said monitor is changed from said endoscope-image-display scene to said patient-data-list-display scene by said scene-changing system;

a selection system that selects individual patient data from said patient data list displayed on said monitor; and

a display-control system that displays said selected individual patient data together with the endoscope-image on said monitor when the scene on said monitor is changed from said patient-data-list-display scene to said endoscope-image-display scene by said scene-changing system.
